

Hosted Exchange

Take advantage of Venom IT's secure hosted Exchange solutions to save you time and money on your email.

If you're looking for first-class, secure email hosting, then look no further than Venom IT

Are you tired of email server outages, memory space issues, bounce-backs, spam, blacklists, bandwidth problems, DNS dilemmas and so on?

Then let Venom IT host and manage your Microsoft Exchange Email.

Why Microsoft Exchange?

Microsoft Exchange Server is the trusted business-grade email system.

As well as providing best-in-class email management, it's widely used for task management, calendaring, sharing documents and much more.

Why Venom IT?

If you're looking for first-class, secure email hosting, then look no further than Venom IT.

Our email hosting is:

Secure:

Our hosted solutions mean that your email is incredibly secure, no hacking or snooping will occur. You won't have to worry about potential viruses and spam emails, we will mitigate these issues through our advanced anti-spam and virus functionality.

Low Cost:

By choosing a hosted email solution, there's no need to invest in expensive physical servers; you'll also save on other costs such as security, dedicated staff, monitoring and power bills. You won't get email cheaper anywhere else, we'll beat your current provider.

Synchronised across Devices:

You will be able to seamlessly synchronise across multiple devices and with enough memory space to never run out again.

We're now a Microsoft Partner in Silver Datacentre, Silver Hosting, Silver Midmarket Solution Provider!
