

# Skype for Business

Take your meetings online using Skype for Business - Venom IT will find the right package for your business needs.

*We can guide you on how to achieve maximum benefits from Skype for Business*

## **Connecting to potential customers can be done smoothly through Skype for Business.**

Webinars and meetings with up to 250 participants can take place using Skype for Business without the need of a mutual location.

Skype for Business also allows PSTN or Dial-in Conference which enables attendees to join a meeting through their landlines and mobile phones. It's also designed to fully integrate Microsoft Office applications such as Excel, Word and PowerPoint.

Files can be shared easily even while the meeting is taking place, giving participants the option to view what's being discussed throughout the conference.

Skype for Business has also integrated new enterprise capabilities which give users the Office 365 plan. You have two options: Office 365 Business Essentials and Office 365 Business Premium.

If you opt for the Essentials plan, Office can be accessed online. If you choose the Premium plan, you will have the Office 365 installed on your computer.

Let Venom IT set up your Skype for Business. We can guide you on how to use its features and how to achieve maximum benefits. A detailed programme can be delivered by our IT experts to you and your employees to ensure connections are smooth and clear.
